

### Step 1

- Get 3 pieces of color coordinated paper
- Cut narrow strips of fringe lengthwise across the paper
- Cut fringe leaving 1/8"-1/4" inch of the paper uncut

\*\*Narrow strips look best

### Step 2

- Start with the narrowest piece of fringed paper
- Place a very narrow bead of glue along the solid side of the paper
- Roll the paper neatly and tightly along the top 1/4" inch of the wire used as the stem

\*\*Use a tiny piece of tape to make it easier to roll  
\*\*Be sure to roll paper straight

### Step 3

- Repeat step 2 with the medium width strip of fringed paper
- Wrap paper exactly over top of the first paper strip

\*\*\*be sure to keep it as smooth as possible

### Step 4

- Repeat step 2 with the thickest piece of fringed paper

\*\* Base of flower should be solid and round without bubbles. To accomplish this, keep paper pulled tight as you wrap it

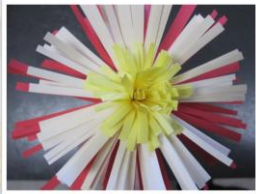

### Step 5

- Pull each "Petal" down to make it appear like a flower

### Step 5 Hint

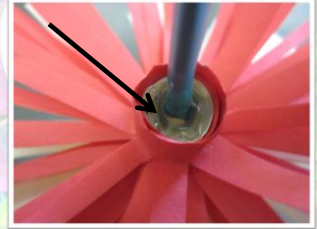

•For curly petals, pull each individual paper between the fingernails of your thumb and 1<sup>st</sup> finger

•For straight petals push down with fingers or lightly wrap around a pencil finger

### Step 6

•If needed place a small amount of hot glue at the base of the flower to avoid having the flower head pop off the stem

### Final Product
